

# RUX InterCompany

**Intercompany processing made more efficient, secure, and accurate.**

RUX InterCompany is a cost-effective and powerful solution to streamline posting transactions from one company to another for the General Ledger (GL), Sales and Receivables (AR), and Purchase and Payables (AP) directly in Dynamics 365 Business Central. Save time reconciling accounts with advanced functionality that automates and controls multi-company transaction management with RUX InterCompany.

## **Complete transactions faster.**

Code each document line to different companies and automatically create related intercompany journal entries in the target company and balancing entries in the source company.

## **Automate offsets.**

Automatically post pending offset transactions in the recipient company.

## **Increase governance.**

Control access to each company by individual Business Central user.

## **Quickly handle recurring posts.**

Repeat past intercompany transactions with the 'copy document' capability.

## **Manage multiple currencies with ease.**

Account for differences in company exchange rates with full multi-currency intercompany functionality.

## **Makes multi-company taxes less taxing.**

Includes recurring journal entries with allocations and posts taxes to the target company.
