

RUX Rentals

Equipment rental management software built to last.

From quote to cash, from contracting to fulfillment, the activity around your assets and inventory is what drives your business. We capture how they are deployed, consumed, or maintained and connect those signals into insights that help you make smarter and faster decisions. These decisions help serve your customers better, optimize the full lifecycle of your assets, and boost your profit.

End-to-end solution.

A complete financial, operations, and rental system with optional service built for Dynamics 365 Business Central.

Rent and sell.

Rent and sell equipment with flexible terms including hourly, best price, prorated, or user defined to match how your customers do business.

Batch invoicing.

Save time with one-time or recurring rental invoicing from a single, easy-to-use screen.

Sub rentals.

Allow overbooking and re-rent third party equipment, simplified with linked PO's.

Service.

Keep equipment running longer with built-in repair tracking and planned maintenance, for your assets or customer-owned.

Visual availability calendar.

View and manage equipment availability at a glance with an intuitive, graphical calendar.
